

Testing, evaluation & reflection

WIP

API test cases available in the repository

PLANNED TESTS

Permissions, approval gates, persistence, duplicate submissions and conflicting updates.

EVALUATION STATUS

End-to-end workflow and build results require verification on the demo commit.

REFLECTION

Traceability links requirements to tests. Connecting the UI, API and database is the next milestone.

CURRENT GAP

Demo data resets on refresh.

NEXT STEP

Connect the UI to the API and PostgreSQL.
